## ABOUT

Dynamic Full Stack Developer with 2+ years of experience in scalable web applications. Proficient in Node.js, Express, Prisma, React.js, and Next.js, with expertise in JavaScript and SQL/NoSQL databases like MongoDB. Committed to delivering high-quality, maintainable solutions.

## PROFESSIONAL EXPERIENCE

### Software Developer

July 2022 – Present

*iTinker*

- **Foodies Only:** 🍷
  - Developed and optimized SSO integration with Google and Meta platforms, streamlining user authentication.
  - Architected and deployed backend infrastructure for personalized meal and party planning, enhancing user engagement.
  - Built scalable APIs using Node.js (Express.js, Prisma) for seamless communication between the Next.js frontend and Node.js backend.
  - Led the frontend team in Next.js development, integrating AEM APIs for dynamic content management.
  - Oversaw the full development lifecycle, ensuring performance, scalability, and seamless user experience.
- **Education App Development:**
  - Engineered a comprehensive edtech application for efficient student class management, assessments, and real-time communication.
  - Developed RESTful APIs using Node.js and Express to ensure smooth interactions between the frontend and backend systems.
  - Implemented a robust database management system to handle student data and assessments effectively.
  - Integrated web socket technology to facilitate real-time communication, enabling seamless chat functionality and note-sharing features.
  - Collaborated closely with frontend developers to ensure a cohesive and responsive user experience.
- **iTinker Website:** 🍷
  - Single-handedly developed the frontend of the iTinker.io website from scratch using Next.js and React.
- **Payment Gateway:**
  - Developed a payment gateway website using Next.js and Node.js.
  - Integrated Razorpay and Paytm gateways to facilitate secure and convenient payments.
  - Generated personalized payment links for custom payment needs.
